PROFESSIONAL SUMMARY

Research Professional with a Distinction MSc in Clinical Mental Health Sciences (UCL), combining applied consumer insight work with academic and clinical research rigour. Delivered research across 15+ projects for 10+ global brands in 10 international markets, including qualitative findings behind a published product launch (Comixit, developed with Beano) and market summaries across 13 countries for a global fandom study. Recognised internally as the team's Recollective platform expert. Also experienced in dementia research, clinical audit and PRISMA-guided systematic review, having screened 975 records to a final synthesis of 24 studies. Skilled across qualitative and quantitative methods, from discussion guide design to client-facing reporting and evidence-based recommendations.

CORE SKILLS

- **Research Design & Delivery:** Discussion Guides, Screeners, Survey Design, Multi-Methodology Research (Interviews, Focus Groups, Co-Creation, Surveys), Informed Consent
- **Platforms & Tools:** Recollective (Advanced, In-House Expert), Qumind (Survey Scripting, Logic, Quotas), Qualtrics, SurveyMonkey, Covidence, Jamovi, Excel (Pivot Tables, Formulas, Data Cleaning)
- **Analysis & Reporting:** Qualitative and Quantitative Analysis, Thematic Analysis (Braun and Clarke), Insight Synthesis, Client Reporting, Meta-Analysis
- **Systematic Review & Clinical Research:** PRISMA Methodology, Newcastle-Ottawa Quality Assessment, Multi-Database Literature Search (Medline, PsycINFO, Embase, CINAHL, Web of Science), Neuropsychological Assessment (NTB), Clinical Audit, MDT Collaboration
- **Client & Stakeholder Management**: Senior Stakeholder Presentations, New Business Pitches and Proposals, Recruitment Management

MARKET RESEARCH & CONSUMER INSIGHTS EXPERIENCE

Kids Industries London, UK
Research Executive *Apr 2025 - Present*

- Deliver consumer insight and brand strategy research for 10+ global brands, including LEGO, Danone, Tonies and Pokémon, across 15+ projects in 10 international markets, managing 2 to 4 concurrent studies.
- Independently manage qualitative recruitment end to end, from screener development and recruiter briefing through to profile review and session setup.
- Design and deliver research materials, including discussion guides, screeners and surveys, spanning interviews, focus groups, surveys and co-creation sessions.
- Analyse qualitative and quantitative data using 10+ platforms, including Recollective and Qumind, synthesising findings into clear, client-ready reports.
- Contributed to the research design, analysis and reporting behind Comixit, a children's app publicly launched with Beano and cited in trade press, from a 20-participant study across 5 friendship groups.
- Independently authored market summaries across 13 countries (1,500 to 11,000 respondents), translating survey findings into market-specific positioning recommendations that informed the brand's global repositioning strategy.
- Identified the engagement and disengagement drivers behind 22 respondents' viewing behaviour for a children's TV format, informing Season 2 changes to presenter delivery style.
- Recognised internally as the team's Recollective platform expert, independently designing and programming online qualitative studies.
- Contributed to new-business pitches through desk research and RFQ development, helping secure a year-round client retainer of 6 to 7 projects annually.

Inforens Remote
Research Analyst *Aug 2023 - Sep 2023*

- Analysed 200+ survey responses on the needs and barriers facing prospective international students, combining quantitative pattern analysis with Braun and Clarke thematic analysis.
- Reshaped the platform's student-mentor matching model through an adopted recommendation for 1:1 peer mentoring based on the research findings.
- Contributed to successful grant applications, including Innovate UK and Barclays Eagle Labs.

CLINICAL & ACADEMIC RESEARCH EXPERIENCE

Tower Hamlets Memory Clinic, East London NHS Foundation Trust London, UK
Clinical Placement *Dec 2023 – Sep 2024*

- Facilitated a clinical audit assessing the robustness of clinician-family discussions on the genetic basis of dementia diagnoses, presenting findings to clinicians at workshops and conferences.
- Cut assessment time by 25% on the NHS dementia diagnostic pathway, organising clinical research data for the implementation of genomic investigation as part of the Clinical Pathway Initiative.

Queen Mary University of London London, UK
Research Assistant, Wolfson Institute of Population Health (APPLE-TREE Study) *Jan 2024 - Sep 2024*

- Administered the Neuropsychological Test Battery with 20+ older adults on a live dementia-prevention intervention study, obtaining informed consent under strict study protocols.
- Maintained 100% data accuracy and cut entry errors by 30%, double-checking results across paper and digital (Qualtrics) records.

University of Memphis Remote, United States
Research Assistant *Dec 2021 - Dec 2022*

- Advanced the evidence base on psychotherapy efficacy, including the influence of therapist attire and communication style, through completed meta-analyses, literature review, title and abstract screening, and data abstraction.

EDUCATION

University College London London, UK
MSc Clinical Mental Health Sciences, Distinction *Sep 2023 - Sep 2024*
