PROFESSIONAL SUMMARY

Research professional with a Distinction MSc in Clinical Mental Health Sciences from UCL and hands-on experience across dementia research, clinical audit and systematic review methodology. Conducted a full PRISMA-guided systematic review across five academic databases, screening 975 records to a final synthesis of 24 studies, building on an undergraduate Psychology dissertation that achieved 95%. Combines this methodological rigour with applied clinical research experience, including cognitive assessment delivery on a live dementia-prevention study and clinical audit work supporting genomic testing implementation within an NHS memory clinic.

CORE SKILLS

- Systematic Review & Evidence Synthesis:** PRISMA Methodology, Newcastle-Ottawa Quality Assessment, Multi-Database Literature Search (Medline, PsycINFO, Embase, CINAHL, Web of Science)
- Clinical & Cognitive Research:** Neuropsychological Assessment (NTB), Informed Consent, Clinical Audit, MDT Collaboration, Meta-Analysis
- Analysis Methods:** Thematic Analysis (Braun and Clarke), Qualitative and Quantitative Data Analysis, Literature Screening and Data Abstraction
- Tools:** Covidence, Jamovi, Qualtrics, Excel (Data Cleaning, Pivot Tables), Academic Database Searching

RESEARCH EXPERIENCE

Kids Industries <i>Research Executive</i>	London, UK <i>Apr 2025 - Present</i>
- Conduct qualitative and quantitative research across 15+ applied projects for 10+ organisations across 10 international markets, managing 2 to 4 concurrent studies at any time. - Shaped the research design and analysis behind Comixit, a children's digital product publicly launched in partnership with Beano and cited in trade press, from a 20-participant study across 5 friendship groups. - Independently authored research summaries across 13 countries (1,500 to 11,000 respondents), translating large-scale survey data into evidence-based recommendations. - Identified behavioural engagement and disengagement patterns from 22 respondents through structured qualitative research, directly informing product development decisions. - Recognised internally as the team's expert in the Recollective research platform, independently designing and programming online qualitative studies.	
Queen Mary University of London <i>Research Assistant, Wolfson Institute of Population Health (APPLE-TREE Study)</i>	London, UK <i>Jan 2024 - Sep 2024</i>
- Administered the Neuropsychological Test Battery with 20+ older adults on a dementia-prevention intervention study, obtaining informed consent under strict study protocols. - Maintained 100% data accuracy and cut entry errors by 30%, double-checking Neuropsychological Test Battery results across paper and digital (Qualtrics) records.	
Tower Hamlets Memory Clinic, East London NHS Foundation Trust <i>Clinical Placement</i>	London, UK <i>Dec 2023 - Sep 2024</i>
- Facilitated a clinical audit assessing the robustness of clinician-family discussions on the genetic basis of dementia diagnoses, presenting findings to clinicians at workshops and conferences. - Cut assessment time by 25% on the NHS dementia diagnostic pathway, organising clinical research data for the implementation of genomic investigation as part of the Clinical Pathway Initiative.	
Inforens <i>Research Analyst</i>	Remote <i>Aug 2023 - Sep 2023</i>
Improved outcomes for a platform's target population through an adopted research-driven recommendation, drawn from thematic analysis of 200+ survey responses.	
University of Memphis <i>Research Assistant</i>	Remote, United States <i>Dec 2021 - Dec 2022</i>
Advanced the evidence base on psychotherapy efficacy, including the influence of therapist attire and communication style, through completed meta-analyses across multiple outcome measures.	

EDUCATION

University College London

London, UK

MSc Clinical Mental Health Sciences, Distinction

Sep 2023 - Sep 2024

- Dissertation: Episodic Future Thinking in Dementia, a Systematic Review (72%, Distinction). Searched 5 databases, used Covidence to screen 536 of 975 records identified, and synthesised 24 studies following PRISMA guidance, applying the Newcastle-Ottawa Scale for quality assessment.
- Modules: Core Principles of Mental Health Research (69%), Current Research in Depression and Anxiety (73%).

University of Delhi

Delhi, India

BA Psychology, Distinction

Nov 2020 - May 2023

- Dissertation: Exploring Therapeutic Alliance through the Cultural Lens, a Qualitative Analysis (95%). Conducted 5 semi-structured interviews and applied Braun and Clarke thematic analysis using Jamovi.
- Modules: Statistical Methods for Psychological Research (95%), Applied Social Psychology (76%).

ADDITIONAL INFORMATION

- Certifications: Good Clinical Practice, Social & Behavioural Research, Health Information Privacy and Security, GDPR Training, Conflicts of Interest.
- Languages: English (Native), Hindi (Native).
